SUMMARY

Motivated and detail-oriented fresher seeking a Data Scientist / Data Analyst role. Proficient in Python, SQL, and data visualization tools with hands-on experience through academic projects and internships. Passionate about transforming raw data into actionable insights to support data-driven business decisions.

TECHNICAL SKILLS

- **Programming Languages:** Python, R, SQL
- **Python Libraries:** Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn
- **Databases:** MySQL, PostgreSQL, SQLite
- **Data Visualization:** Tableau, Power BI, Matplotlib, Plotly
- **Machine Learning:** Linear Regression, Logistic Regression, Decision Trees, K-Means Clustering, Random Forest
- **Other Tools:** MS Excel (VLOOKUP, Pivot Tables), Jupyter Notebook, Google Colab, Git, GitHub

EDUCATION

Bachelor of Technology in Computer Science Engineering 2021 – 2025
XYZ Institute of Technology, Bhubaneswar, Odisha CGPA: 8.5 / 10

Class XII – Science (PCM + Computer Science) 2019 – 2021
ABC Higher Secondary School, Odisha Percentage: 85%

Class X 2018 – 2019
ABC High School, Odisha Percentage: 90%

PROJECTS

Customer Churn Prediction [github.com/yourusername/project1](#)
Python, Scikit-learn, Pandas, Matplotlib, Logistic Regression

- Developed a machine learning model to predict customer churn for a telecom dataset of 7,000+ records using Logistic Regression and Random Forest.
- Performed exploratory data analysis (EDA) to identify key churn drivers such as contract type, tenure, and monthly charges.
- Achieved 87% accuracy and 0.84 AUC-ROC score after hyperparameter tuning.

Sales Dashboard and Trend Analysis [github.com/yourusername/project2](#)
Python, Pandas, Tableau, SQL, Excel

- Analyzed 2 years of retail sales data using SQL queries and Python to identify seasonal trends and top-performing product categories.
- Built an interactive Tableau dashboard with KPIs including revenue, profit margin, and region-wise performance for business stakeholders.
- Provided insights that highlighted a 15% revenue dip in Q3, enabling targeted marketing strategy recommendations.

Movie Recommendation System [github.com/yourusername/project3](#)
Python, Pandas, Scikit-learn, Cosine Similarity, NumPy

- Built a content-based filtering recommendation system using cosine similarity on the TMDB

movie dataset with 5,000+ entries.

- Preprocessed and vectorized text features (genre, cast, keywords) using TF-IDF to compute movie similarity scores.
- Deployed as a simple command-line tool capable of returning top-10 personalized recommendations.

COVID-19 Data Analysis and Visualization

Python, Pandas, Matplotlib, Seaborn, NumPy

- Performed exploratory data analysis on global COVID-19 dataset to study infection rates, recovery trends, and mortality across 180+ countries.
- Created 10+ visualizations including heatmaps, line plots, and choropleth maps to communicate findings clearly.

INTERNSHIPS / EXPERIENCE

Data Analyst Intern

June 2024 – August 2024

Company Name, City, State (Remote / On-site)

- Cleaned and processed 50,000+ rows of customer transaction data using Python and Excel, reducing data errors by 20%.
- Generated weekly performance reports using SQL and Power BI for the marketing team, saving 5 hours of manual reporting per week.
- Collaborated with cross-functional teams to deliver data insights that supported campaign targeting decisions.

CERTIFICATIONS

- Google Data Analytics Professional Certificate – Coursera (2024)
- IBM Data Science Professional Certificate – Coursera (2024)
- Python for Data Science and AI – IBM / Coursera (2023)
- SQL for Data Science – UC Davis / Coursera (2023)
- Machine Learning Foundations – NPTEL (2023)

ACHIEVEMENTS

- Ranked in top 15% on Kaggle Titanic Survival Prediction competition.
- Winner – Data Hackathon 2024 organized by XYZ College Tech Fest.
- Completed 30 Days of Google Cloud Program with all badges earned (2023).
- Active contributor on GitHub with 200+ contributions in 2024.
