PROFESSIONAL SUMMARY

Motivated **Computer Science & Engineering** undergraduate with a solid academic foundation in **Data Science, Data Analysis, and Machine Learning**. Hands-on proficiency in **Python, SQL, Pandas, NumPy, Scikit-learn, Power BI, and Excel**, with practical project experience executing exploratory data analysis (EDA), feature engineering, statistical modeling, and deploying predictive ML applications. Dedicated to leveraging analytical, mathematical, and algorithmic capabilities to deliver actionable insights in an entry-level Data Analyst or Junior Data Scientist role.

EDUCATION

Bachelor of Technology (B.Tech) – Computer Science and Engineering

2023 – 2027

College: KMBB College of Engineering & Technology, Khurda

University: Biju Patnaik University of Technology (BPUT) | Odisha, India

Higher Secondary Education (+2)

2021 – 2023

College: Dr. Harekrishna Mahatab Higher Secondary School, Kupari

Board: Council of Higher Secondary Education (CHSE), Odisha

Matriculation (10th)

2020 – 2021

School: Sakuntala Nodal High School, Jiritai

Board: Board of Secondary Education (BSE), Odisha

TECHNICAL SKILLS

Programming:	Python
Data Analysis:	Pandas, NumPy, Exploratory Data Analysis (EDA)
Data Visualization:	Matplotlib, Seaborn, Power BI
Machine Learning:	Scikit-learn, Regression, Classification, Clustering
Deep Learning:	TensorFlow, Keras, Neural Networks, CNN
Databases:	SQL, MySQL, SQLite, PostgreSQL
Tools:	Microsoft Excel, Jupyter Notebook, Anaconda, VS Code
Version Control:	Git, GitHub

PROJECTS

Thiranex Data Science Project

🐙 [GitHub](#) | 🖱️ [Live Demo](#)

Technologies: Python, Streamlit, Scikit-learn, Pandas, NumPy, Matplotlib, Seaborn

- Engineered a 4-in-1 Data Science & ML web application deployed on Streamlit Cloud covering automated data preprocessing and analytics.
- Built predictive ML pipelines for retail store sales forecasting and customer churn risk classification with financial ROI simulation.
- Implemented statistical workforce EDA dashboards and interactive visual analytics for data-driven business decisions.

Movie Recommendation System

🐙 [GitHub](#)

Technologies: Python, Pandas, NumPy, Scikit-learn

- Built a recommendation engine using Python and Scikit-learn to provide personalized film recommendations.
- Processed movie metadata, performed feature extraction, and created vector representations of film attributes.
- Implemented a similarity-based recommendation approach to calculate item affinity and suggest relevant movies based on user preferences.

Netflix Data Analysis

🐙 [GitHub](#)

Technologies: Python, Pandas, NumPy, Matplotlib, Seaborn

- Performed data cleaning, missing value handling, and data preprocessing on the Netflix content dataset.
- Conducted exploratory data analysis (EDA) to identify trends across content genres, release years, and audience ratings.
- Created clear visual distributions using Matplotlib and Seaborn to communicate patterns in movie and TV show additions over time.

INTERNSHIP / TRAINING

Data Science Virtual Intern / Trainee

Thiranex (Virtual)

Focus: Applied Machine Learning Pipelines & Business Intelligence Dashboards

- Engineered end-to-end predictive machine learning workflows using Python and Scikit-learn focused on customer churn prediction and retail sales estimation.
- Developed automated data cleaning, outlier treatment, and feature transformation routines to standardize multivariate business datasets.
- Built dynamic visualization modules and statistical analytics dashboards using Streamlit to present findings clearly to stakeholders.

Full Stack Data Science Trainee

PythonSoft LLP | 2026

Focus: Python Programming, Relational Databases, EDA, and Supervised Learning

- Completed hands-on practical training in Python data science ecosystems, relational database querying with SQL, and tabular manipulation with Pandas and NumPy.
- Designed complete analytical workflows covering exploratory data analysis (EDA), hypothesis validation, and executive dashboard development using Power BI.
- Practiced software development fundamentals including version control using Git/GitHub and modular script organization.

CERTIFICATIONS

Full Stack Data Science – PythonSoft llp (pythonsoft.org) – 2026

[View Certificate](#)

Introduction to Large Language Models – Google Cloud (Simplilearn) – 2026

[View Certificate](#)

Encoder-Decoder Architecture – Google Cloud (Simplilearn) – 2026

[View Certificate](#)

Introduction to Generative AI – Google Cloud (Coursera) – 2025

[Verify Credential](#)

ACHIEVEMENTS

- Developed and deployed 5+ data science, data analysis projects.
- Maintained active version control with 40+ contributions on GitHub across personal and open-source repositories.
- Earned 4+ industry-recognized certifications in Data Science, Generative AI, and LLMs.

SOFT SKILLS

Analytical Problem Solving

Data-Driven Decision Making

Quantitative Reasoning

Technical Communication & Reporting

Cross-Functional Collaboration

Time Management & Prioritization

Continuous Learning & Adaptability

LANGUAGES

English: Professional Working Proficiency

Hindi: Conversational Proficiency

Odia: Native / Full Professional Proficiency

INTERESTS & FOCUS AREAS

Exploratory Data Analysis & Data Storytelling

Applied Machine Learning & Predictive Modeling

Business Intelligence & KPI Dashboard Design

Open-Source Collaboration

Generative AI & Applied LLMs
